NEVADA CITY NUGGET GRASS VALLEY

30c PER MONTH AND WORTH A LOT MORE

Vol. 21, No. 77 | The Twin Cities Paper NEVADA CITY-GRASS VALLEY, CALIFORNIA | The County Seat Paper | TUESDAY, AUGUST 26, 1947

BROAD STREET

By Harley M. Leete, Jr.

DESSIREE BOB! Even dogs like the Nugget. We quote verbatim from a letter received yesterday morning: "Nevada City-Grass Valley NUGGET: Would you please mail me the Nugget of August 22nd, as Emmon's dog got our copy and chewed it all to pieces and we were following the story of the Diary of a Deer."

MERRILL ST. is going to the cats! Sunday we acquired a small pink cat that appeared out of nowhere. We more or less adopted this exceedingly lazy animal. The word must have gotten around even faster than usual in this town, for Monday morning what happens but we discover a whole boxful of kittens on our doorstep. Boy, can they mew! Can they devour milk!

The new members of the Leete family total five. There's the pink cat, he's two or three months old. The four doorstep kittens are apparently about 10 days old. One of them is a beautiful smoky black color with light green eyes. One is all grey; and the other two are grey and white.

All of them apparently have rocks in their head. Here's why: They're only about four inches long, and look as if they are too weak to fight their way out of a wet paper bag, yet their favorite stunt is full of dare-devil and derring-do; they climb all the way up the face of the screen door and then turn and jump about six feet to the porch floor. They land with a sickening thud and, with big smiles on their little faces, immediately turn and start all over again.

SPEAKING OF CATS, Jake Schramm of Gold Flat missed his cat for six days and then discovered it meowing like mad, THIRTY-FIVE feet up a drain pipe on the side of his house, stuck and most unhappy. Schramm was unhappy, too, when he had to tear up his floor to liberate the feline, of whom we might say that its energies were too narrowly channeled.

FROM COLUMBIA, South Carolina, we have a beautiful hot flash on parking meters. Seems those clever South Carolinans have solved the meter problem even for those rugged cases where the car owner wants to park for over an hour and does NOT want to collect a great big violation tag. The motorist simply fastens an extra nickel to the meter with scotch tape after depositing his regular nickel for the first hour. When the copper strolls up to check the meters, he notices the nickel there, untapes it and deposits it for the two-hour parker. Simple, no? And it says here in fine print: "There is no record that anyone has ever stolen one of the nickels."

FRANK CRAMPTON has written the City Council an enormous (four typewritten pages, single-spaced) letter on how he does not want a sewage disposal plant established on the Ronnigen property on the banks of Deer Creek. He's sent the Nugget a copy and if we have room, we'll probably print it in the Letters to the Editor department although, frankly, we consider sewage disposal plants a rather smelly subject. That's a pun, son.

YOUNG GINGER GLEASON, 9-year-old equiestrienne who rides a very tall horse, demonstrated a novel method of mounting when she won the musical chairs contest at the Gold Trail Riders Happy Daze rodeo. She shinnied up the front leg of the horse, who didn't seem to mind a bit.

Mr. and Mrs. Joe T. Moran have returned after visiting in San Francisco.

Dr. and Mrs. Harry F. Benteen have returned to their ome in Berkeley after visiting here for a few days.

THREE FIRES ARE STOPPED SUNDAY

GRASS VALLEY: State Forestry fire crews mastered two blazes Sunday afternoon, while volunteers stopped one. One was in the Cedar Ridge area on the Colfax road near this city. This blaze burned out six or seven acres before being gotten under control. Homes in Cedar Ridge were threatened, and householders protected their structures by dampening roofs.

Shortly after this outbreak was reported, another occurred at the Allison ranch, where it burned over 20 acres of woodland before being controlled.

The third fire started at the Bullion but was quelled by volunteer personnel before it got far from the starting point.

REGISTRATION FOR SCHOOL IS THURS. AND FRI.

NEVADA CITY: Registration for the fall school semester will take place for elementary and kindergarten students at the elementary school on Thursday and Friday. Freshman and new students at the high school will register from 10 a. m. to noon Friday.

Kindergarten children who registered last spring do not need to do so again. Miss Frances Mason will have charge of the kindergarten classes, which, while new classrooms are being completed, will be held in the auditorium.

Miss Gertrude Goyne, Mrs. Doris Foley, Mrs. Mary Warneke, Mrs. Irma Atkins, Mrs. Jean Smollett and Miss Savory Ford will teach in the first three grades.

Mrs. Elise DeMattei, Mrs. Kathryn Carlson, Mrs. Ruth Hogan, Mrs. Alice Clark, Mrs. Alice Thibault, Mrs. Luvia Kilroy and Mrs. Mabel Flindt will teach grade four through eight.

The school board is considering applications for choral music teacher and boys' physical education.

The Board of Education has purchased the Coughlin residence on Washington street. The building will be remodeled and serve as quarters for the kindergarten and the first grade.

An addition to the high school will be a new cafeteria building, now in the process of construction. This consists of two Quonset huts placed end to end.

LOCAL CONTRACTORS TO BUILD MODERN MOTEL

COLFAX: George S. Latin, general building contractor of Grass Valley, has announced the acceptance of a contract for the construction of a 16-unit $200,000 ultra-modern year around motel resort at an Emigrant Gap site on U. S. highway 40. Construction will start immediately.

Final contract negotiations were completed last week by Latin with Dr. and Mrs. C. E. Widing, and daughter, Joan, Dutch Flat residents and formerly of San Francisco.

Russell Mills, of Reno, is the architect in charge of the project.

To be known as the Rancho Sierra Inn, the resort will be El Rancho style with 16 motel units. Adjoining construction will include a dining room, cocktail lounge and swimming pool, the latter to be 75x25 feet in size. Stables to house the horses for hunting and fishing trips will also be included.

Other features will be a rumpus room and dormitories for the use of winter skiing parties.

The location is three-fourths of a mile east of Emigrant Gap on the U. S. Highway 40 at Carpenter's Flat.

Subcontracts were awarded to the following firms: Durrim Plumbing Company, Auburn; George E. Golvin, plasterer, Grass Valley; William Slater, electrician, Grass Valley; Van Pickens, brick mason, Grass Valley; John Bray, painting, Grass Valley and Grass Valley Paint and Glass Company.

TAX RATE SAME AS LAST YEAR: $1.40 PER $100

NEVADA CITY: At an adjourned session, the city council decided upon the same tax rate assessment that was in force last year. The rate is $1.40 per $100, divided as follows: General fund, $1.00; fire fund, 20c; library fund, 20c.

City Clerk and Assessor George Humphrey Calanan announced that the assessed valuation of the city of Nevada on the city assessment rolls is $1,538,290, with a public utility roll valuation of $114,080. The two total $1,652,370.

DOG JUMPS STAND ROCK . . . In the early 1880s, Henry H. Bennett, pioneer photographer, made first action shot of his son leaping across the gap between mainland cliff and towering Stand Rock landmark at Wisconsin Dells, Wis. An accident to a guide in the 90s caused the owners of the scenic property to prohibit further jumping. Recently, however, Bennett's grandchildren trained a large dog to make the leap (see inset) for benefit of amateur photographers.

PERSONALS

Henry R. Smith, Mrs. W. H. Butler and Miss Ida Manseau, visited relatives in South San Francisco Sunday, but were unable to see Ross Manseau, who recently was operated on in St. Francis Hospital in San Francisco.

Chief of Police Frank Knuckey, with his wife and family, has returned from vacationing at Lake Tahoe and San Francisco.

Mr. and Mrs. Emil Such, former residents, have been visiting friends here.

WORK ON SCOTT'S FLAT DAM ONE-THIRD FINISHED

GRASS VALLEY: Harold Woods of Blackie and Woods, construction engineers for the Nevada Irrigation District, reported to the board of directors that an average construction height of 29½ feet has been reached in the Scotts Flat Dam. Woods said that the D-S canal is approximately one-third completed and that the Ophir-Combe canal work is 30 per cent complete.

Regarding a complaint received from the Fish and Game Commission that insufficient water was being released from Bowman Lake to keep the fish alive, Manager William Durbrow told the board it had never been the practice to release water from the lake and that in the past leakage and seepage had been sufficient for the purpose. The commission asked for two second feet release of water. Durbrow said this would amount to $18.00 per day, and that in the current dry season with lack of water and limitation on district's revenues, he did not think the district was warranted in making the release.

N. I. D. STILL IN QUANDARY OVER NEW MANAGER

GRASS VALLEY: The Nevada Irrigation District met yesterday and, in an atmosphere of comparative calm, continued to ponder the difficult problem of replacing Manager William Durbrow. Only six landowners attended the meeting.

A. B. Sanford, a leader of a previously dissenting faction, opened discussion when he desired a report from the committee assigned to study the management personnel problem.

Former judge of the Superior Court George L. Jones and O. G. Griffiths both spoke before the board, urging the utmost care and deliberation in selecting a successor to Durbrow.

Attorney Lynne Kelly was directed to take any steps necessary to the condemnation of land needed for the Scott Flat Dam spillway.

Gold Trail Riders Plan New Horse Show

NEVADA CITY: Another free "Fun on Horseback" day was planned to take place Sept. 14th by the Gold Trail Riders at a special meeting held Friday night at the Memorial Park Club House. Many requests by riders and members of the audience who enjoyed the event previously held were responsible for the repetition of the affair. It was also voted that the second Sunday of each month would become horse show day with the riders gathering at Dick Lostutter's Happy Daze Ranch at Casey Corners, with contests, calf roping, children's events and stock horse events being the order of the day.

The following officers were elected to fill vacancies and offices newly added to the club. Jerry Jarrard was elected vice president; Wes White, second vice president; Dick Lostutter, "Chief Wrangler;" Toni Harpe, executive officer; and Sam Frost was selected to represent the group as a delegate to the California State Horesmen's Convention. Mitch Painter had already been named as the other delegate.

At the request of the local County Fair board, represented at the meeting by Mrs. Mary Landi of Grass Valley the following committee was appointed to work on the Horse Show to be given at the fair grounds at Watt Park during the days of the Nevada County Fair Sept. 9th and 10th. The same committee was delegated to put on the horse show at Happy Daze Ranch Sept. 14th. The members are: Jerry Jarrard, Mitch Painter, Dick Lostutter, Ruth Bowles, Violet Anderson and Sam Frost.

CHAMBER GROUP TO MEET ON QUESTION OF CLOSING SEPT. 9

GRASS VALLEY: Louis Hartman, chairman of the retail activities committee of the chamber of commerce, has called a meeting of the committee for this noon at the Holbrooke Hotel. Purpose of the meeting will be to decide whether or not local retail houses will close on the first day of the County Fair, which is scheduled for September 9 and 10.

BRAVES WALLOP MERCHANTS 6-4

GRASS VALLEY: The Grass Valley Braves of the Placer Nevada League edged out the Nevada City Merchants of the Foothill League Sunday afternoon 6 to 4 at Watt Park.

The Merchants, underdogs of the game, made the Braves go to the last of the eighth inning to win, when Daley's triple drove in two unearned runs across the plate.

Nevada City drew first blood in the third inning when Jones singled, Haddy bunted, and Clark drove across the run.

Grass Valley came back with two in the last of the third when W. Trathen singled, Painter sacrificed, Plumtree tripled, and Hooper singled to drive him home with the second run.

Nevada City regained the lead in the fifth on a "Brooklyn Play" which saw the ball thrown all over the infield. Here's how it happened. Babe Childers doubled, Jones walked and Haddy was hit by the pitcher. In an effort to get the tieing run in Haddy pulled a delayed steal. Daley, G. V. catcher, tossed the ball to first base and Orzalli and Lacrosse proceeded to run the runner down with Childers coming in with the tieing tally. Jones went to third and the ball to home and back to second where they proceeded to run Haddy down again and Jones scored with Haddy being called out sliding into second on a very close decision.

The Braves tied it up again in the last of the fifth on hits by Plumtree, T. Hooper. The tieing run came across on an error by the short stop.

The Merchants jumped right back when Childers received a HP, Jones walked and Haddy drove Childers home.

Grass Valley tied it up again when an error on the third baseman and a double by Dick Trathen scored one.

The Braves put the game on ice when First Baseman Childers fumbled a grounder, Haddy dropped a fly ball in right field and Daley got his second triple of the day.

That was it. . . One of the best battles of the year at the Grass Valley Park with the home team winning 6 to 4.

Heavy hitters for the Braves were Daley with two triples and a single, Plumtree a triple and single, D. Trathen, a double and single, Hooper two singles, with Trathen, Lacrosse, Thompson, Orailli, each collecting a single.

Clark collected two hits for the Merchants, Babe Childers a double, Jones 1 for 3 walking twice, and Haddy 1 for 2 with a Hp and a Sacrifice.

FRANK CRAMPTON OPPOSED TO PROPOSED SEWAGE PLANT LOCATION

(Ed. Note: Frank Crampton, government engineer and local property owner, here tells his views on the proposed location of the city sewage disposal plant on the Ronnigen property. This letter is not to be construed as representing the Nugget's viewpoint, since it has no opinion, either favorable or unfavorable to the proposed location of the plant.)

August 20, 1947

The City Council,
City of Nevada,
Nevada City,
California

Gentlemen:

A protest is hereby made to the installation of a sewage treatment plant proposed to be built within the city limits of Nevada City, on land known as the Ronnigen property. The location as shown on the topographical sketch plan, in rough and alternate form, was as submitted by Headman, Ferguson and Carollo, Engineers, Phoenix, Arizona, to be in the area south of Deer Creek and immediately west of the Woodpecker Ravine.

One vitally important element is not shown on the plan. This is a gas burning chamber for the highly explosive and oderiferous gases generated by certain of the plant elements. Possibly this is an oversight and if not, a gas-burning chamber must be provided.

The gases generated are highly oderiferous, offensive and very dangerously and highly explosive. I have seen parts of treatment plants completely destroyed, and heavy damage done to nearby houses, buildings or other installations from improper control, burning or carelessness which has resulted from ex-

(Continued on Page 5)

NEAR MILLION TROUT PLANTED IN THIS AREA

NEVADA CITY: Andy Weaver, in charge of fish planting, announced Saturday that 975,000 trout have been planted from the Bear River base in streams and lakes throughout the area.

Of the fish planted, 200,000 are eastern brook reared at the Lake Tahoe Hatchery, and 775,000 are rainbows from Mt. Shasta Hatchery.

Pack horses and mules used in conveying the young trout from the Bear Lake base to lakes and streams in the higher altitudes were supplied by the U. S. Forest Service, the Grass Valley Rifle, Rod and Gun Club, and stock men: W. A. Black, Tom Cole, Ralph Emerson and Bob Blackford.

LIONS STEAK BAKE A SUCCESS DESPITE COLD

NEVADA CITY: Despite the lower than usual temperature, the Lion's Club of Grass Valley enjoyed their annual steak bake at White Cloud on highway 20 Thursday evening with a large delegation of the Nevada City Lions Club as their guests.

Over 100 members, their ladies and guests attended. Art Remple's sound truck provided recorded music and entertainers from the New Deal Cafe accompanied the community singing. Added to these attractions was the Lions own "Barber Shop Quartet."

J. F. O'Conner was general chairman of the outing and President William Esterly was master of ceremonies at the dinner and program.

47 NEVADA COUNTY STUDENTS FOR PLACER

NEVADA CITY: Forty-seven students from Nevada County have so far applied for admission to Placer College, according to a report from Earl Crabbe, registrar.

Other applications so far received include 12 from Lincoln, 36 from Roseville, 13 from Eldorado and 7 from Folsom: the current total of students, including 272 who attended last year, is 542.

RENTAL LEASES BEING SIGNED IN QUANTITIES

SACRAMENTO: Landlords and tenants in five western states are signing voluntary leases calling for an increase in rent rates at an increasing tempo, the office of Ward Cox, Regional Rent Administrator for Arizona, Nevada, California, Oregon and Washington, has reported. Last week more than 22,000 leases were filed, compared with 4036 during the corresponding week in July. During the six weeks under the Housing and Rent Act of 1947 a total of 50,000 leases have been signed.

W. M. Bayless, area rent director, of the Sacramento rent control office, reports that thus far his office has received 1,116 leases, and that the number of leases being filed is increasing steadily.

The average lease, Bayless said, calls for an increase of about 11 per cent in the rent rates, compared with an average increase of 13 per cent for the nation. Many leases, he said, are being rejected by his office because they are improperly dated, reduce service for the tenant, contain improper provisions, or call for more than a 15 per cent increase in the rate of rent.

Nevada County Long Ago - -

Floy Margaret Reynolds

20 YEARS AGO

One of the richest gold finds in many years was made by M. J. Mognett, former owner of the Nevada City Garage, on his claim three miles south of Sierra City. Surface rock running as high as $100,000 per ton was among the find, samples of which were on display at the Nugget office and which created a veritable sensation for blase Nevada Cityans who are accustomed to seeing rock in all its phases. Mr. Mognett brought 500 pounds of milling rock to town to mill at the Murchie mill. The ore was of the rich jewelry type, the native gold lay in heavy clusters. The 500 pounds of ore yielded 1400 ounces of gold, estimated at $22,500, which was placed in the Nevada county bank.

Bob and Bill Tamblyn, Jack Raynor, Bob Tucker and Charlie Graham returned from Camp Pahatsi, the Boy Scout camp near Cisco, where each had won at least five honors and a good suntan during their week's stay.

The very large Freshman class entering the Nevada City high school included Elizabeth Thomas of French Corral, Harriett Bleakley, Lois Eden, Cecelia Genasci, Bernice Coughlan, Genevieve Evans, Deynes Foley, Ruth Gleason, Gertrude Marriott, Ruth Smith, Evelyn Granholm, Lillie Sowden, Adele Deschwanden, Tom Hogan, Laurel Phillips, May Netz, Thomas Wasley, Billy Jeffery, Joe Sbaffi, Calvin Fisher, Dahl Larsen, Eugene Katzer, Lionel Davies, Leroy Hoskins, Caswell Fisher, Carl Hieronimous, Vernon Sandow, Arnold Selicani, Carl Murchie, Clayton Scheffer, Margaret Rector, Luther Thompson and Alton F. Davies.

50 YEARS AGO

Dr. Freeman of Nevada City won first prize in the blue rock pigeon shooting match at Marysville, hitting fourteen out of fifteen. Mark Elliott, formerly of this county, won first prize in a match of live birds, killing eleven out of twelve.

Isolta Pasquala of Nevada City was advertising for sale the spacious new building on Sacramento street known as the Sacramento Restaurant and Lodging House.

The Excelsior Water and Mining Company had finished hauling their share of the barley crop from their ranch on Coon Creek, rented by B. A. Joslin, to their mill at Smartsville and stated that they expected to use the entire amount as feed for teams that would be working on the grade for the railroad they were intending to build from Marysville to Nevada City. Operation on the road was to begin in the early fall.

Harry Odgers and wife returned from San Francisco where Mr. Odgers had been attending the great council of Red Men.

B. F. Stoakes, who established the first water works in Nevada City and was a plumber by occupation, received his "walking papers" from a position he had held in the United States mint in San Francisco for over twenty years and which had been secured for him by the late Senator Aaron Sargent during his first term in the house of representatives.

75 YEARS AGO

The board of trustees appointed Mr. T. J. Lyon to the grammar department and Mrs. L. M. Moore to the primary department of the San Juan school.

From the Truckee Republican, 1872: The Washoe squaws here are not entirely devoid of wit although their looks are not entirely indicative of pertness or beauty. A railroad employee observed a squaw possessed of a papoose which from appearance had as much Caucasian as Indian blood in its veins. The impudent fellow asked her if the child was Indian. The Mahala replied, "It half Injin, half ingineer."

The following persons were drawn by the county clerk to serve on the grand jury: J. P. Stone, H. C. Mills, N. W. Knowlton, Delos Caulkins, Ed. Carney, W. C. Stokes, Jonathan Clark, Frank Coffy, Geo. Turner, Jos. Worrell, Alex Stoddard, J. C. Rich, B. B. Laton, J. J. Ott, H. P. Sweetland, Chas. Marsh, J. F. Moody, J. A. Seely, Geo. Hamilton, L. H. Dille, R. B. Gentry, John Parker, Ed. Muller and W. H. Duryea.

We want no war with Russia but unless Russia wants no war with us, we will have war.

Paper production is greater than ever; it won't be long before you can answer your letters.

FORTY-THREE COUNTIES IN CENTENNIAL GIRL FAIR QUEEN CONTEST

SACRAMENTO: Forty - three counties so far have indicated their intention to send entrants to compete for the title of Centennial Girl at the California State Fair in Sacramento, August 29-30-31, it was announced today by Ned Green, secretary-manager.

The fair opens in Sacramento August 28, to run through September 7.

Los Angeles county will select its queen from 5,232 candidates in a contest to be held in the Hollywood Bowl Wednesday, August 20. The queen will be chosen from 25 finalists selected from the 5000 aspirants. Movie actors and directors will judge the Los Angeles County contest.

Counties which have completed their local contests and named queens include: Calaveras, whose choice is Dorothy Duart of White Pines; Colusa, Mary Lang of Colusa City; San Diego, Jean Lofthouse of National City; Sutter, Carolyn Mock of Yuba City; and Tehama, which selected Jo Ann Miller of Red Bluff.

The county queens will be flown to Sacramento for the State Fair Centennial Girl contest and the winner will tour the United States for three years to publicize California's Centennial celebrations.

Other counties that have indicated that they will have entrants in the contest are: Alameda, Amador, Butte, Contra Costa, El Dorado, Glenn, Kern, Kings, Lake, Lassen, Madera, Mendocino, Merced, Modoc, Monterey, Napa, Nevada, Orange, Plumas, Sacramento, San Bernardino, San Francisco, San Joaquin, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Siskiyou, Sonoma, Stanislaus, Trinity, Tulare, Tuolumne, Ventura, Yolo and Yuba.

No more of this!

No more fumbling with your house key because inadequate wiring failed to include a switch-controlled light for a dark porch.

No more complaints from the lady of the house who plaintively asks,

"Why didn't we put in enough electric outlets so I can use my vacuum cleaner or electric toaster without a bothersome tangle of cords and wobbly plugs?"

Yes, Adequate Wiring brings the convenience of plenty of outlets properly placed. It brings more light switches. It means more wiring circuits of large enough wire (at least size 12) to deliver full power electricity.

Insist on Adequate Wiring in the home you buy or build.

REMARKABLE EXHIBIT ON FOODS – STATE FAIR

SACRAMENTO: Are you buying hamburger which has been embalmed? Are you using cottonseed oil in the belief it is pure olive oil? Or, is the pepper you use for seasoning a few grains of the real pepper mixed with grains of wood?

If you want the answers and you wish to learn how some racketeers bilk the public, a visit to the State Department of Health exhibit in the Education Building, California State Fair, Sacramento, August 28 through September 7, will soon set you right.

Under the direction of J. R. Dieffenbacher, special agent for the Bureau of Foods and Drugs, the exhibit is rapidly taking form. A color scheme of white and blue has been used and samples of adulterated products which are often sold, and which the bureau promptly checks, will be on display.

Dieffenbacher will also show patent medicines for the Gay Nineties, which have disappeared from the market; other remedies which have been found useless and manufacturers forced out of business; slides showing unsanitary restaurants; and general work of the bureau.

Glass balls filled with colored water which formerly hung in the windows of drug stores of an earlier era will be used to decorate the exhibit.

In an adjoining booth, the department will show a community home canning kitchen in operation with gas and water being piped into the building to operate the display.

LOCAL MAN LEAVES ARMY

HOUSTON, (Tex.): Pfc. Nelson S. White of Nevada City has been ordered to the Separatoin Center at Brooke Army Medical Center, and upon expiration of terminal leave will be discharged from military service.

He was formerly stationed at Brooke Army Medical Center, Fort Sam Houston, Texas, one of the army's largest and most complete medical installations.

A United States flag made from silk gowns donated by ladies of Portsmouth, N. H., was the first national ensign to be saluted at sea by a foreign power.

Uncle Sam Says

Millions of my nieces and nephews are increasing their take-home pay by the simple, automatic Payroll Savings Plan. Let's take one example. Suppose you tell your employer that you want to take $6.25 of your weekly pay in Bonds. In three weeks the accumulation of $18.75 will buy one $25 Savings Bond. Merely by holding these bonds to maturity in 10 years you are raising your take-home income $2.08 every week. It is obvious that the so-called deduction for Savings Bonds is not a deduction but a way for you to store up and increase your earnings for your future use.

U. S. Treasury Department

GOOD ANSWER

The teacher wrote on the blackboard: "I ain't had no fun all summer." Then she asked a youngster on the front row: "Harry, what should I do to correct that?"

"Get a boy friend," Harry suggested.

In Service

Cute neighbor — Have you folks got a bottle opener I could borrow?

Parent—Sorry, he's in the navy now.

A Real Souvenir

Joe was dead, and Bill called on the widow to express his sympathy.

"Joe and I were mighty close friends," he said. "Isn't there something I could have to remember him by?"

Tearfully she raised her eyes and whispered, "Would I do?"

It's the Upkeep

"Well," began the genial father-in-law, "I talked it over with Mother. We have another home out at the lake so we are going to sign this place over to you and Rosabel."

"Why—ah—thanks," sighed the son-in-law, "but really, aren't the taxes here a bit high?"

NUGGET RECIPES

During the hot weather, it behooves us all to save ourselves from the heat as much as possible. We can do this by some of the recipes for short cuts in cooking. Many delicious and novel desserts can be made in a few moments, some require no cooking.

Uncooked Lemon Pie

1½ cups condensed milk
2 eggs
½ cup lemon juice
Grated rind of 1 lemon.

Blend together condensed milk, lemon juice, grated rind and egg yolks. Pour into baked pie shell. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven until brown. Chill before using.

Graham Cracker Cake

1 tablespoon butter
1 cup condensed milk
1 egg
1 cup finely rolled graham crackers
Pinch of salt
1 teaspoon baking powder
½ teaspoon vanilla
½ cup chopped nut meats

Melt butter, add to the condensed milk, add well beaten egg yolk and the cracker crumbs, add baking powder and salt. Fold in stiffly beaten egg whites. Pour into well-greased baking dish. Bake 25 minutes in a moderate oven. Serve plain or with whipped cream.

Frozen Cheese Salad

1½ packages cream cheese
¼ cup chopped green pepper
¼ cup chopped nuts
Paprika
Salt
2 teaspoons lemon juice
Whip ½ pint of cream stiff.

Cream the cheese with a fork until soft. Add the pepper, nuts, paprika, salt, lemon juice and the cream. Pack in a freezing tray and chill until firm enough to slice. Cut into small squares and serve on slices of tomatoes, arranged on lettuce. Garnish with mayonnaise.

Royal Cocktail

Pit 1 cup of white cherries, cut in cubes, 1 cup of pears. Make 2 cups of juice, using ¾ cup pineapple juice, 1 cup of orange juice, and ¼ cup lemon juice. Combine fruit and juice. Chill and serve.

Fruit Sponge

1 cup fruit pulp (peaches, cooked apples, cooked prunes, or apricots).
White of 3 eggs
Salt
Sugar to taste

Rub the fruit through a strainer. Add sugar and salt. Beat the egg whites stiff and fold in the fruit mixture. Turn into a mold ¾ full, place in pan of hot water. Bake in a moderate oven until firm. Serve with custard sauce.

Angel Dessert

Whip ½ pint of cream stiff. Fold in to this 1 cup of angel cake torn in very small pieces; add ½ cup marshmallows, quartered; ¼ cup green mint cherries, quartered; and ¼ cup blanched almonds, shredded lengthwise. Toss all lightly together, pile in sherbert glasses and chill Garnish with green cherries and tiny mint leaves.

Lime Ice

½ cup lime juice
2 egg whites
1¼ cup water
Pinch of salt
½ cup sugar
Small quantity of food coloring.

Cook sugar and water for 10 minutes. Add strained lime juice and cool. Add green coloring. Chill and freeze. When nearly frozen pour into bowl and whip. Add well beaten egg whites. Freeze.

Sprinkling of dairy cows with cold water by means of a fine spray and allowing them a period in the shade helps to maintain milk production on hot days.

P. C. A. VERY BUSY

GRASS VALLEY: The local chapter of Progressive Citizens of America met Tuesday evening, August 19th. Bill H. R. 16 was one of the topics discussed. The chapter voted to support that bill.

Plans are going forward for a mass meeting scheduled for Saturday, September 27.

BIRTH

MAU—In Grass Valley, Nevada County, August 16, 1947, to Mr. and Mrs. Malcolm Mau, a son.

BIRTH

STOLL—In Grass Valley, Nevada County, August 17, 1947, to Mr. and Mrs. Charles H. Stoll of Rocklin, Placer County, a daughter.

Guilty on Three Driving Counts, J. G. Hogg Pays $325

GRASS VALLEY: John Gilbert Hogg, 28, of this city, appearing before Justice of the Peace Charles A. Morehouse, pleaded guilty to driving while under the influence of liquor, to hit and run driving, and to driving without a driver's license. He was fined $225.

The hit and run charge resulted from his striking a car parked on South Church street.

We sometimes wonder what monkeys have to take the place of soap operas.

FUNERAL HELD FOR MRS. S. N. WILLIAMS

NEVADA CITY: Funeral services were held Monday afternoon in Holmes Funeral Home for Mrs. Sierra Nevada Williams. Rev. Russell Lincoln conducted the service. Internment was in the Pine Grove Cemetery.

Mrs. Williams was born in Blue Tent, five miles from this city 87 years ago. She was the daughter of the late George and Milissa Sutherland, who named her after the granite barrier they had crossed in a covered wagon train.

Until the last few days Mrs. Williams enjoyed excellent health. She died at her home on Orchard street, which has been in the family for 55 years. She was a member of Neva Rebekah Lodge of this city.

In 1938 Mrs. Williams removed to Fresno where she had since resided with her sister, Mrs. Melissa Fuller. Surviving is another sister, Mrs. Luis Seibert of Sacramento, and a step-son, Frank P. Williams, Jr., of Sacramento.

BILL JOYAL WILL BE PLACER COLL. COACH

NEVADA CITY: Major Bill Joyal, graduate of Nevada City High School and Placer Junior College, and a former air corps officer received an appointment to the coaching staff of the Placer Union High School this week, Harold E. Chastain, district superintendent announced.

Joyal was formerly head coach of the Nevada City High School where he turned out many winning teams. Last year he served as Commandant of Cadets at Placer and the coaching duties will be added to his military job.

KEEP SAFE DISTANCE

Insufficient distance between cars is the usual cause of rear-end collisions. To prevent such accidents the California State Automobile Association recommends keeping a distance of one car length for each ten miles of speed between your car and the one ahead, thereby allowing for reaction and braking time in case of emergency.

USE LOW BEAM

Highway safety demands, and the Vehicle Code, require that drivers of cars equipped with multiple-beam headlights use the low beam when an approaching vehicle is within 500 feet.

SAFETY IN COURTESY

Rude highway manners are not merely unpleasant, they are really dangerous. The California State Automobile Association points out that courtesy and consideration for other drivers could reduce highway accidents by 50 per cent.

University of California Extension will publish in October a revised listing of several thousand educational motion pictures available to schools, clubs and forums.

Calves require more vitamin A in cold weather than in warm weather.

FRANK CRAMPTON OPPOSED TO PROPOSED SEWAGE PLANT LOCATION

(Continued from Page 1)

plosions of these gasses. While such explosions are not frequent, the menace is continually present to the nearby homes and persons living in them.

This protest is made particularly on behalf of the owners of the property known as 500 Jordan Street but which also includes 502, 504, 506, 508, being within the same property, as well as other property owners on Jordan Street, commencing at the Bret Harte Dairy, which could be seriously affected, by the gasses being absorbed into the milk, butter and other creamery products, whether having an odor or not. And this protest could also include property owners along Deer Creek and owners of property on, or adjacent to Woodpecker Ravine, as far on Piety Hill as the Miners Hospital.

The property owners of Nevada City should be completely informed of the details of the plant and of all the elements connected with the consideration of the plant location. Particularly in regard to winds, dampness factors, etc., etc., which affect the immediate and nearby properties. They should also be informed that the winds are from the west and not from the east across Piety Hill. They should not be lulled into quietude or apathy by uninformed statements.

I am informed by Mr. Calahan, and others, that inspections were made of sewage treatment plants in towns nearby and that there were no odors and nothing objectionable in any way with the plants visited. In this regard I wish to call attention to the fact that the plants were visited on clear days, and at times when odors or other objectionable conditions would not generally prevail. I have never, from personal observation of sludge drying beds and trickling filters, over a period of many years, seen either of these elements when they did not give off objectionable odors, and in many cases very objectionable odors, even under the average favorable conditions.

This protest is made, in particular part, lesser factors being omitted, on the following specific points:

1. That the sewage plant should not be built within the close proximity to residences, and in a residence district, which already has numerous dwellings and, in addition, the planned construction of at least four (4) more on 500 Jordan Street, and probably between fifteen and twenty elsewhere close by.

2. That a treatment plant should not be built within the Nevada City limits, especially when it is almost in the "back yard" of at least three residence homes, particularly when there are other sites that can be secured.

3. That full consideration should and must be given to possible later damage suits which will, or may, accrue against the City of Nevada by the building of the treatment plant on the presently located site. It is not sufficient to say that "no damage now exists," which it does not, but damage could and might, and in all probability will exist and when damage does occur the City of Nevada will face costly law suits which will result in the payment of damages far above the possible higher costs that might be necessarily made if the plant were now properly located. As a taxpayer I protest that this consideration must be given due and great weight. I am sure other tax payers feel the same and particularly when a small amount of foresight will avoid unnecessary later damaging and offensive conditions.

4. That the prevailing winds, of which the City Council is well aware, will carry objectionable odors east along Deer Creek into Nevada City residential and business districts, and up Woodpecker Ravine and to the residential and school and hospital areas of Piety Hill. That there may not be constant and continual objectional odors is granted, but when such odors do exist, and prevail, as they most certainly will, the conditions in the areas mentioned could and might be very unpleasant and certainly most objectionable.

5. That the dampness of Deer Creek and the proximity of the plant to this dampness will create a condition resulting in damping and wetting the drying sludge; which is the solid residual of all of the matter brought down through the sewage collection system and not digested to an inoffensive solid material; which by being wetted or dampened will create or recreate odors which will be carried up Deer Creek and through Woodpecker Ravine into the business and residential areas, at the times when the winds are blowing from the west or from a westerly direction, particularly at night, and cloudy or stormy days.

6. That the location of the Imhoff and trickling filter is badly conceived, in that pines and cedars as well as other trees and brush must be cleared and felled to provide clearings required for these elements. Attention is called to the fact that trees and brush of most kinds will absorb odors, and in no case should be removed or cut down.

7. That the actual physical damage, in addition to the psychological effect and damage caused thereby, will accrue to nearby residences from the location of the treatment plant at the presently proposed location.

8. That the conditions prevailing at other plants, such as those visited by members of the City Council, are no criteria as to the emination of odors, or the creation of a nuisance at other plants or at other locations. There are a multitude of factors which must be given great weight and consideration as no two plants are subject to the same physical or meterological factors of any other, regardless of the same identity as to type and operation. In fact the climatic factors and conditions, specific location as well as many other affecting and controlling circumstances differ so widely that to say one plant operates without any objection and that a similar one will operate with equal success, is absurd.

9. That the only plan now available to anyone interested does not give sufficient detail or information upon which to base further protest and the protests here made are those which are known and which are known will prevail at the treatment plant, and at the location which has been selected by the City Council.

10. That the interested persons and property owners have not been furnished with full and complete information by the City Council, and the advertisement and notice published in the newspaper of Nevada City, was insufficient in its details and specifications and, further, did not come into the hands of many of the persons who were most interested.

11. That members of the City Council have made statements that there will be no nuisance, or no odors, and nothing whatever objectionable in the plant or its operation, without the experience, knowledge or information to make such statements of any value. And by statements of this nature have quieted the fears of numerous persons affected to the extent that they have not given the matter the serious consideration and attention it should have had.

12. That in a discussion with the Public Health Department, State of California, at Berkeley, I was informed that they did not consider the Ronnigen Property the most ideal location or a desirable site. In fact considerable effort was made to secure other land further downstream on Deer Creek.

13. That there are at least two good, and in some ways much better locations about one-half mile and another one and one-quarter miles down Deer Creek from the presently propposed site.

14. That the prevailing wind is up Deer Creek and Woodpecker Ravine, that is:- from the west, from the northwest and in each case toward Nevada City. In 1939 I submitted a windrose to the City Council, taken on a two year observation, which showed the prevailing winds as here stated. In other words, as nearly as can be determined, greater than 60 per cent of the prevailing breezes or winds are from the west, up Deer Creek and Woodpecker Ravine, toward Piety Hill and the business area of Nevada City.

15. That there is heavy mist and dampness in Deer Creek during the evening and most of every night and in the early morning hours through 7 to 8 months each year. The dampness at this time is causing greater objectionable odors to be carried easterly up Deer Creek during the darker hours of the days than during the light hours, on account of this dampness. This information was presented to the City Council in 1939.

16. The dampness will, as heretofore stated, create an added wetness to the sludge and greater odors will result therefrom.

This protest is written to the end that the City Council will immediately reconsider the location of the proposed treatment plant and proceed as if no action had previously been taken. It is suggested that the City Council again advertise, giving the complete specification and location of the plant, stating in such advertisement the data which they have at their disposal of the windrose given them in 1939, and not resort to oral statements.

For the information of the City Council, the property of 500 Jordan, containing four other lots, has not been considered for sale and in February, 1947, an offer of $16,500 was refused therefor. It has been at all times the intention to make that property a home and to also build thereon at least for dwellings for income purposes. There has been no change in that desire or plan. It was first delayed by the war and now from the proposed location of the treatment plant.

Your immediate reply is requested by letter. There is no intent to interfere with the building of a sewage treatment plant, but there is an intention to prevent a damage by ill advised location of such a plant in a location within the Nevada City limits which will result in a condition detrimental and damaging to the property owners nearby as well as at some distance therefrom.

Your consideration is requested as it affects not only ourselves but many others within the city limits.

Very truly,
Frank A. Crampton and Helen Crampton.
By Frank A. Crampton.

FUNERAL THIS MORNING FOR MRS. EMILY MARSH

NEVADA CITY: Funeral services will be held this morning at Holmes Funeral Home for Mrs. Emily Elizabeth Marsh, who died Saturday morning at her home on Washington Road. Mrs. Ida Magonigal of the Christian Science Church will read the service. Burial will follow in the Odd Fellows cemetery.

Mrs. Marsh was a native of Nevada City, born in 1869. She was educated in the local schools. Her parents, Elijah and Elizabeth Hothersall, were pioneers.

Survivors are her two sisters, Mrs. Bessie MacBride and Mrs. Adeline Curtis.

IT TAKES ONLY 1½ YARDS,

THE - Diary of a 49'er

FROM THE BOOK EDITED BY C. L. CANFIELD

MARCH 30, 1851—It is astonishing how many people are coming to California. The hills are crowded with miners and prospectors and we hear good reports everywhere. Dozens pass by our cabin every day, bound for the streams farther up the mountains, and as many more on their way back. It don't seem possible, but it is strange the number of hard luck stories one hears, for there are many who are disgusted with the country and are tramping their way back to San Francisco. There was a big fire in Nevada last week and all of the principal stores, hotels and houses were burned down.

We have had a sad case on the creek. Allen Talbot, who is little more than a boy, has been ailing all winter and has been struck with paralysis. He is completely helpless and the doctor says the only chance he has is to go to the hospital. He had no money, so we raised a subscription. Pard and I gave a hundred and fifty dollars. The lad was taken away yesterday and it is a question if he ever recovers..

As a rule, considering the exposure and hardships, the most of us are in the best of health. It's a queer sort of life we lead; back-breaking work all day; doing our cooking and washing; no amusements, except a friendly game of euchre and an occasional trip to town. There is nothing there worth while, except the gambling saloons and the Mexican girls at the fandango house. We long for the company of decent women, and while there are a few scattered around and more coming, still the miners do not get much chance to associate with them. I am looked upon as particularly favored, because Madame Ferrand rides out to the claim to see me, and it is a please to be with her, but that will all end shortly. Pard and I are going to the Bay next week and she is going along, and will leave for France shortly after. She sold her share in the French claim for seven thousand dollars and tells me she has got about forty thousand dollars put away. That is a pretty good stake for a woman. I have learned quite a lot of French and can talk a little to her in her own language.

Sam Carter was bitten by a rattlesnake last week over on Round Mountain. He was out hunting and sat down on a log and the snake struck him in the leg. He cut out the bite with his knife, rushed to town and the doctor brought him through all right, but it was a narrow squeak.

Kellog has finished his ditch to Brush Creek. It is about three miles long. He has agreed not to interfere with us, but there is plenty of water for everybody.

APRIL 6, 1851.—Pard, the Madame and I are off for the Bay tomorrow. It was a question what we would do with our claim, as under mining law a day's work must be done every week to hold it. Finally Tom Gleason and Jack Fisk agreed to strip top dirt for us once a week, we to pay them an ounce apiece a day for their work. They are good friends of ours and will keep the jumpers off. Pard is the leader and the most popular man on the creek and we are not afraid of any of our neighbors, but some outsiders might take a notion to the ground. We live up to our home-made law strictly and it is understod that unless the specified amount of work is done the claim is open to location, even when the tools have been left in it. We have had one case on the creek of a young fellow from Maine, who has been laid up with rheumatism pretty nearly all winter. He had a good claim and in order to hold it for him the boys have taken turns working it for him, putting in one day a week. We have taken out nearly enough to pay for his grub and now he is back working it himself and doing well.

Pard dug up his dust; it was under the chimney back of the cabin. I gave him two thousand five hundred dollars to go along with it and he has sent it down to the Bay by Freeman and Company's express. He says it will almost break his heart to part with "Jack," but Gleason has promised to take good care of both the dog and the horse. We have engaged seats and paid passage in Bower's stage to Sacramento and will take the boat from there down.

APRIL 27, 1851.—Back after a three day's trip. We had a great time and it has been a holiday that both Pard and I have enjoyed. It was like getting back to civilization again, although San Frnacisco is not the same sort of place as most eastern cities. There is a rush of people going and coming, men from the mines with their pile and men from the States on their way to make it. We have lived high while we were there; our meals averaged about two dollars each, but we did not begrudge it after a year's steady diet of pork and beans. The gambling houses were a sight and it was good for sore eyes to see so many well dressed and good looking women. Pard made his investment, buying about 20 fifty-vara lots about half a mile out on the Mission road and six over on North Beach. I never had less faith in an investment. Our land is nothing but a pile of white sand and, while there is some chance for North Beach to grow, the city will never get out to our Missoin lots in a hundred years.

The neighbors were all glad to see us back and Jack went wild. I don't know which was the happiest—Pard or the dog. Nobody has bothered our claims; Gleason and Fisk had kept their contract and we will begin work again tomorrow.

MASS FLIGHT OF PLANES AT STATE FAIR SEPT. 7TH

SACRAMENTO: What may be the greatest mass flight of civilian planes in United States aviation history will converge on the California State Fair in Sacramento Sunday, September 7, to participate in a giant air program scheduled for that day. The event will be sponsored by the San Francisco Chapter of Women Flyers of America, of which Mrs. Dorothy Deere is president.

Approximately 2,000 to 3,000 planes are expected to take part in the air cavalcade, according to H. P. Green, secretary-manager of the State Fair, who announced that the flyers are to be guests of the Fair at a luncheon in Sunset Gardens on the fairgrounds from 11:00 a. m. to 2:00 p. m.

Invitations have been sent out by the fair to 800 airports and private flying clubs throughout California, Nevada and Arizona, urging flyers to participate in the mass flight. Personal invitations to Hollywood movie star pilots have been issued by Claire Carey, publicity director of the Women Flyers organization.

General Mark Clark, commanding general of the Sixth Army, General H. H. (Hap) Arnold, and General Ira Eaker, retired, have also been invited to attend the program.

A trophy has been selected by the State Fair for presentation to the flyer for the farthest distance traveled to Sacramento. The planes will land at the Sacramento Municipal Airport, with the spill-over to be taken care of at McClellan Field. Transportation to and from both airports has been arranged by Fair officials.

HASTE MAKES WASTE

Pedestrians shouldn't take too seriously the old adage: "He who hesitates is lost." The California State Automobile Association says, "He who hesitates and looks both ways before stepping off the curb may avoid a serious accident."

CAMPTONVILLE NEWS

By MRS. J. D. RITTENHOUSE

CAMPTONVILLE: Mr. and Mrs. Myron Pauly made a brief visit to Yuba City Sunday afternoon.

Mrs. Iva Mae Clark left for Nevada City Saturday where she will spend a few days in the sanitarium.

Mr. and Mrs. W. C. Williams and Mrs. Clarence E. Hanson made a trip to Smartville last Wednesday to attend a meeting of the Order of the Eastern Star.

Mrs. Belle Merriam and son, Lawrence, of Dobbins were in town Saturday on a short visit.

James A. Milner, sr., spent the weekend at Reno, returning Sunday evening.

Mr. and Mrs. Harold P. Vindhurst made a brief business trip to Nevada City Saturday.

Mr. and Mrs. George Brown of Southern California spent a few days visiting her sister, Mrs. Grace Pauly.

Mr. and Mrs. Joseph Pahnke of Oakland spent the past weekend visiting their summer home here.

Mr. and Mrs. Frank Moore, who spent the past several months at Hotel Francis, moved to Grass Valley last week.

Ray Knickrem arrived Monday from Battle Mountain, Nevada, to spend a few days visiting his sister, Mrs. Grace Pauly.

Mr. and Mrs. Ralph E. Rogers returned last week from a three weeks trip to Texas, Louisiana and other southern states.

Lee Kendall left Saturday for his home at San Francisco after spending two weeks visiting his cousin, Fred C. Kendall.

Mr. and Mrs. Frank A. Pendola, Jr., and son, Frankie III, spent the weekend visiting relatives at Grass Valley.

Jess McCain and son, Calvin McCain, of the bay area, former residents, arrived a few days ago and spent a few days visiting their old home here.

Bob Shelton left a few days ago for Southern California for a few weeks preparatory to his return to his home at New Mexico.

Dr. Frederick G. Niemand and wife of San Francisco arrived a few days ago to spend three weeks at their Sanitarium property here.

M. R. Stoddard was a business visitor at Marysville last Tuesday.

Clarence O. Brown, proprietor of the Sunnyside Greenhouses at Nevada City, was in town on business Friday.

Mrs. Louisa Price made a business trip to Marysville one day last week.

Mr. and Mrs. Abner Kennedy and son of Alameda were in town Monday visiting their old home here.

Mrs. Olive Groves was a business visitor at Nevada City Tuesday.

Mr. and Mrs. George Seim of North San Juan were in town Tuesday evening on business.

Ralph E. Rogers and mother, Mrs. Jos. R. Rogers, and party made a brief business trip to Nevada City Tuesday.

Mrs. Leo W. Chatfield and daughter, Mrs. Etta Mae Klenzendorf, made a brief business visit to Nevada City Tuesday.

M. S. Smart of Nevada City was in town Wednesday on a short business visit.

Mrs. Nelson S. Stone made a brief business visit to Nevada City Wednesday.

Mr. and Mrs. Erle Pauly and Nickolas Rothe were visitors at Nevada City Sunday.

Mr. and Mrs. Charles D. Dodson of Grass Valley were in town Tuesday evening on business.

Rev. and Mrs. James Teel and daughter returned Wednesday from a two weeks' vacation spent at the bay district and other distant points.

AUTOS ENTERING STATE THROUGH TRUCKEE IN JULY TOTALED 34,659

TRUCKEE: This area continued to show a huge gain in the number of vehicles entering California via Highway 40 during July when the figure jumped from 28,295 for June to 34,659 for last month, according to figures released by the state department of agriculture, which keeps a check at the local quarantine station.

These figures do not include local cars, trucks and stages, there being 1472 trucks and 773 stages. No record is kept of local vehicles traveling only as far east as Reno and return.

The total of 36,834 vehicles carried 116,774 passengers.

The only California station exceeding Truckee was Yermo which reported 45,208 vehicles with 148,909 passengers. Truckee entered more buses and trucks than Yermo.

At Stateline on Highway 50, less than one-quarter of Truckee's total or 8,774 cars entered the state and a total of 25,306 passengers were checked, while Brockway, which connects with Highway 40, checked 1,508 vehicles with 4,687.

Senator and Mrs. H. R. Judah have been recent guests of Mr. and Mrs. H. M. Leete of this city. Mrs. Leete and Mrs. Judah were girlhood friends.

California produces more than one-third of the nation's canning tomatoes and puts up about two-thirds of its tomato paste and sauces, a University of California study shows.

Football Focus

John McAllister Lewis

Attention athletes, if you plan to do your best this coming football season and avoid unnecessary injury start training now. Deep knee bends, push ups and several other exercises plus lots of running will make it possible for you to start out the season in shape, and odd as it may seem, too many pigskinners wait until the first practice to start oiling their creaky joints. Waiting invites charley horses, shin splints, and other muscular aches and pains.

Also, by showing up at your first scheduled practice ready to go you're insuring yourself a fair chance of winning a position and also boosting your school's stock for the ensuing season. Remember fellows, regarding injuries, they generally fall in two categories (one) lack of physical conditioning, (two) lack of fundamental football knowledge.

Paul Brown, currently coach of the champion Cleveland Browns, is a stickler for conditioning and the results have been obvious and consistent. At Massilon High School he established an unparalleled record of victories. At Ohio State he won the mythical national championship, and now in professional circles his success is continuing.

Keep in mind he has no secret systems or formation and generally goes through his practices in conventional form, with one exception —special impetus on drills, calisthenics and other conditioning exercises. At the beginning of each season Brown explains what his training requirements are and then unlike some coaches he insists upon these training rules being adhered to.

He has been known to request the uniforms of outstanding players, one in particular on All-American; for breaking training. Some may react to this method as too businesslike for use in a sport. On the contrary, let's look at it this way, any coach that does not insist upon physical conditioning and training, especially in a bodily contact game, is not giving his players the protection from injury that they deserve. So again I say come on players, get out that football and get started.

There's a very interesting university located in South Bend, Indiana, that is especially noted for good football teams and sometimes your writer likes to sit down and try to figure out why. It isn't the extreme size of the school because we can easily name many that are considerably larger.

Could it be that the Irish are physically superior? No that wouldn't be the answer because many of Notre Dame's outstanding players are not Irish. How about their coaches? Well, naturally they are in a position to have a top notch coaching staff—but it doesn't seem to matter who the head mentor is, they always do well. Regarding their schedule they annually play several top notch elevens all over the country.

Seems to me that there is something deeper than the above considerations that may provide the answer to why every Notre Dame eleven I have ever seen, or heard about, plays with an eagerness and determination seldom equaled. Yes, the answer probably lies in the tradition and spirit that could best be explained by football's immortal Knute Rockne.

How many of you remember last years Army-Navy classic wherein the Navy almost sank the Army despite the efforts of bull-dozer Blanchard and the fleet footed Davis. Well, the cadets are losing the fore mentioned touch-down twins and sports writers seem to be looking upon the service school eleven with undue sympathy.

The Irish, it is said, plan to do good job with the hapless cadets but don't be surprised if both Army and Navy footballers surprise everyone with outstanding teams. For one thing everyone knows that coaches Blaik and Hamilton are excellent mentors plus the fact that their squads are always in the best possible physical condition plus another fact, not so generally known, there is plenty of experienced material on hand at both schools. Frank Leahy at Notre Dame is theoretically in for a cinch season but he is well aware of his two main enemies: one, overconfidence; two, service schools. Look at the schedule and you will see the Irish meet Navy and the Army in three successive weekends. All three of these worthy opponents are perennially rugged on defense and Army in particular has considerable offensive strength that will be recognized before your writer is willing to acknowledge a slump for the service schools.

Peace officers from all corners of the state will gather on the Berkeley campus of the University of California on September 2 for an intensive two-week conference on the latest techniques and research designed to cut down California's high traffic accident toll.

An almost tearless onion has been developed on the Davis campus of the University of California. The new breed, California Hybrid Red No. 1, is much less irritating than previous varieties.

Uncle Sam Says

How would you like a fat raise? Dream stuff, you say? It isn't. It's a cold-cash, brass tacks reality—if you want it to be. How do you get about it? Very simple. Just sign up for the Payroll Savings Plan where you work or the Bond-a-Month Plan where you bank. For every $3 you put away now, you get $4 in ten years. Take part of your pay each week in U. S. Savings Bonds. That's all. That's a fat gain in any man's arithmetic. And if ten years seems like a long time to look ahead, just give a thought to the smart Americans who bought bonds ten years ago, and hung on to them. Act now. Ten years will be gone before you know it!
